

IMMUNOGEN SUBMISSION FORM

Investigator's Name:	Date:
Immunogen ID:	Type:
Total amount submitted:	Concentration:
Number of tubes:	

Host species:
Dosage to be used for initial immunization per animal:
Dosage to be used per boost per animal:

Special instructions/comments:

This immunogen does not contain live pathogens: (Investigator's initials)

Any material of human origin has been tested by a F.D.A. approved method and found to be non-reactive for HIV-I antibody and Hepatitis B surface antigen (HBs Ag): (Investigator's initials)

Storage Conditions: 4° C -20° C -80° C Other:

Recommended Guidelines:

Host Species:	Dosage/animal/injection:	Buffer:	Maximum volume/injection:
Rabbits/Chickens	100ug – 500ug	PBS	0.5 mL + adj.
Mice	25ug – 50ug	PBS	125 uL + adj.
Goats/Sheep	1mg – 2.5mg	PBS	1.0 mL + adj.
Rats	50ug – 100ug	PBS	250 uL + adj.
Guinea Pigs	100ug – 300ug	PBS	375 uL + adj.

Please aliquot immunogen in doses to be given per injection. Each aliquot should contain enough doses for all animals on the project. For example: If there are 2 rabbits on the project, each aliquot should contain both doses.

For Josman use only:
