

An Antibody Production Company Since 1985

POLYCLONAL ANTIBODY PRODUCTION IN RABBITS:

Polyrab – I phaseTM (Immunization phase):

Day-0	Project Set-up , SPF - NZW
Day-0	Preimmune Serum Sample – 4 mL
Day-0	Initial Immunization
Day-21	Boost 1
Day-35	Boost 2
Day-42	Production Bleed ~ 25 mL
Day-49	Boost 3
Day-56	Production Bleed ~ 25 mL
Day-63	Boost 4
Day-70	Production Bleed ~ 25 mL
Day-77	Production Bleed ~ 25 mL

Total antisera harvest per rabbit: ~100 mL

Total cost per rabbit: \$496.20

Polyrab – P phaseTM (Production phase, if desired):

Every 28 days	Monthly Maintenance Boost
7 days post boost	Production Bleed ~ 25 mL
14 days post boost	Production Bleed ~ 25 mL

Total antisera harvest per rabbit per month: ~50 mL

Total cost per rabbit per month: \$156.10

Polyrab – F phaseTM (Final harvest phase, completes project):

Final Boost	Final Harvest ~ 70 mL of serum
-------------	--------------------------------

Total cost per rabbit: \$150.50

Polyrab – T phaseTM (Terminate, completes project without performing final harvest):

No further procedures

Total cost per rabbit: \$41.00

Polyrab – H phaseTM (Places project on Hold, if desired):

Monthly project maintenance without performing any procedures

Total cost per rabbit per month: \$65.10

Polyrab – C phaseTM (Continuation of boosts for low titered animals, if desired)

Two, bi-weekly boosts per month	Production bleed collected 7 days post second boost ~ 25 mL
---------------------------------	---

Total cost per rabbit per month: \$140.60

Fees are subject to change without notice and do not include shipping charges and sales tax, where applicable.
